

JOB TITLE: Wire EDM Programmer

[Click HERE to Email Resume to hr@jamestool.com](mailto:hr@jamestool.com)

Job Summary:

This position requires strong knowledge of Wire EDM processes, programming, set-up, and the running of the machine. This position also requires that the candidate know how to perform periodic maintenance of the Mitsubishi Wire EDM equipment.

A successful candidate must be able to program offline and develop a plan for the next job(s) while the Wire EDM is running.

When possible during long EDM cycles the candidate must be willing to machine low volume parts on a CNC conversational Lathe, Mill and/or Grind parts. James Tool will train the right candidate on the equipment noted above if the candidate lacks this knowledge.

Job Requirements:

- Strong knowledge of GD&T and Blueprint reading
- Willing to work overtime as required
- Follow and support James Tool's AS9100 & ISO9001 processes

Knowledge, Skills & Abilities:

- Ability to follow verbal and written instructions and possess good communication skills
- Ability to manage and handle consistent change to day-to-day operations and processes

James Tool is an Equal Opportunity Employer
